John,

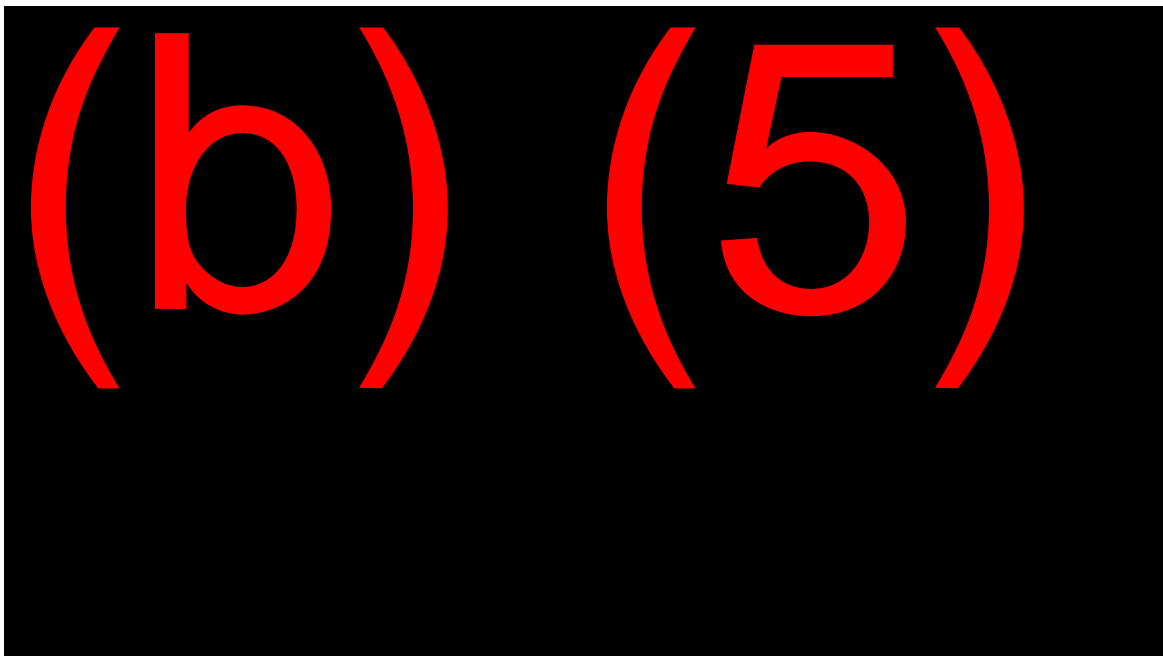

Thanks for your attention to arranging discussions with NCI.

Per conversations, I've sent an invite for meeting with quant folks here for a pre-meeting on NCI related issues for Tue afternoon.

We can ask whether NCI staff would be free Wed afternoon (and would really hope that Lubin and Blair can participate). There is a 3-hour managers meeting planned here for Thur. But if Wed does not work, we could ask whether that Thur meeting can be rescheduled.

Here are some items for discussion:

hi, John. Paul was going to set up a mtg for a few of us on the formaldehyde team to meet to talk about what we want to do with the NCI study and what we need to know from NCI, but that probably wouldn't be until wednesday. meanwhile, i think that you could give a preliminary response to Laura that most of our questions would be about the statistical analyses and quantitative results, although we may also have some more general questions about the study, too. jj

John,

We would be happy to meet with you. It would be helpful to have an agenda of topics so that we can best plan for the appropriate people to be available. What dates and times would be best for your group?

Laura

We had a discussion in NCEA yesterday about the formaldehyde data that

we need to perform a new cancer assessment. Instead of having a teleconference, we believe it would be more productive to have a face-to-face discussion of your study. We would like to meet with you

at the NCI at your earliest convenience. Participants might include

Jennifer Jinot, Danielle DeVoney, Tom Bateson, Paul White, and myself

from NCEA, and you, Aaron Blair, Jay Lubin, and anyone else you would

like to invite. We are quite anxious to meet, so I look forward to

hearing from you soon.

John E. Whalan
